

Introduction to Home Inspection & Residential Construction

*One Day Course – Registration Fee ~~\$135.00~~ Special - \$99.00**

This course provides an overview of the home inspection process, types of business formation, business operation, marketing, the home inspector’s role in the real estate transaction, tools needed, and a review of residential construction from footers to roof rafters covering the construction process, stages of construction, required inspections, and trades associated with residential construction.

Home Inspection Methods - Three Day Course – Registration Fee \$450.00

This course will cover the construction and building details of making the inspection – what to inspect; how to inspect; and how to report – including lot, landscape, and grading; foundation; walls, windows, and doors; attics, basements, and crawl spaces; garages and swimming pools; pest infestation; mechanical systems (electrical, plumbing, cooling, and heating systems); and energy and environmental concerns. Comprehensive review of building systems.

Field Inspections – Half Day Onsite Inspection – Registration Fee \$150.00

Field trips to new building or existing residential properties located within the metro Atlanta area. Registration limited to ensure low student/teacher ratios. Subject property shall be inspected to allow home inspectors, appraisers, real estate agents and/or interested homeowners to become familiar with a variety of home construction and ownership issues. Focus shall be on construction related issues.

Reminder: Georgia has NO licensing requirements at this time to become a Home Inspector. This may be revised in a future legislative session. Those who are already in the business would more than likely become grandfathered into the system possibly avoiding any new regulations required.

Schedules and Specials

- **Bundle Package** - Register for both Introduction and Methods courses - **Save \$85.00** off registration prices – Bundle Price \$500.00. **Must register early*
